JOB OPPORTUNITIES

For Immediate Employment

Positions: Software / Computer Engineers

This motivated, self-starting individual will be part of a software group designing and implementing drivers based on Windows 98, NT, 2000, XP, and Linux for RTD’s line of PC compatible computer, data acquisition and communications boards. Responsibilities will also include BIOS programming for our CPUs.

This position requires a Bachelors Degree in Computer Science or Computer Engineering. Must have experience in Visual C programming. A knowledge of Microsoft operating systems, real-time operating systems, Linux, and computer and data acquisition design principles a plus.

Salary is commensurate with experience and includes an excellent benefits package.
